TECHNICAL SKILLS

- **Languages:** Python, JavaScript, C/C++, Java, SQL, Bash, MATLAB, Assembly
- **Frontend & Backend:** React, Node.js, FastAPI, HTML5/CSS3, Tailwind CSS, REST APIs
- **Devops & Methodologies:** Docker, Git (GitHub Actions CI/CD), Alembic, Agile/Scrum, Sprint Planning, Pytest, Jest
- **AI Tools:** OpenAI Codex, Claude Code
- **Languages Spoken:** English (native), Mandarin (native), & Cantonese (native)

WORK EXPERIENCE

Portal (tryportal.ca) | *Co-Founder & Lead Engineer* *Jan 2026 - Present*

- Powered hiring operations for SFUEA with 60+ active users; secured incoming partnership with SFU Anime.
- Deployed containerized backends on Cloud Run and React frontends on Cloudflare Pages, configuring custom domain subdomains, Cloudflare SSL/TLS security policies, caching rules, and email routing.
- Managed Supabase database migrations via Alembic and configured Resend with custom SPF, DKIM, and DMARC DNS records to ensure email deliverability and domain reputation.
- Reduced perceived latency by implementing optimistic UI updates, skeleton loading states, HTTP query caching, and lazy-loaded modules.
- Enforced end-to-end security using OAuth 2.0, SameSite cookies & requests, SQL injection mitigation, malicious file upload protection, role-based URL access control, and rate limiting.

CaseIT MIS Case Competition | *Director of Web Development* *Aug 2026 - Present*

- Implementing database (PostgreSQL), analysis, and CMS (Content Management System) to support the platform.
- Translating designs into responsive UI components while building integrated tracking and analytics systems.
- Leading Agile sprint planning, weekly stand-ups, and code reviews for associate developers, standardizing Git workflows and accelerating feature delivery.

Grill Master | *Server / Cashier* *Sept 2023 - May 2026*

- Processed 150+ daily transactions with 99% accuracy over 18+ months in a high-volume environment.
- Communicated effectively with team members to resolve customer inquiries and maintain operational throughput.

PROJECTS

EasyChart: Smart Data Visualization Web App | *Node.js, JavaScript, GitHub Actions, Jest* *Jul - Aug 2025*

- Cut LLM (DeepSeek R1) API cost by 50% by refactoring backend logic to batch and deduplicate requests, directly reducing token consumption and average response latency.
- Implemented multi-format data parsing (PDF, CSV, DOCX) and automated graph generation in under 3 minutes.
- Established 100% automated deployment using Github Actions CI/CD with Jest unit tests.

YouTube Comment Analysis Extension | *Python, RoBERTa, Scikit-learn, JavaScript* *Feb - Mar 2026*

- Developed a browser extension that extracts and analyzes YouTube comment sections using *RoBERTa* to categorize sentiment polarity as positive, negative, or neutral.
- Engineered an unsupervised learning pipeline using K-Means clustering to group thousands of comments into thematic clusters, identifying recurring topics and trends.
- Designed a responsive JavaScript UI to visualize analyzed data and insights directly within the extension.

EDUCATION

Simon Fraser University | *B.Sc. Computer Science, Minor in Business* *Sept 2023 - Present*

- **GPA:** 3.35 / 4.33 **| Dean's Honour Roll** (Spring 2025).
- **International Exchange:** Selected for exchange at **University of Hong Kong** (Fall 2026).
- **Leadership:** Community Manager at **SFU Esports Association**
